BATTLEDECK FLOORING FOR ROADWAY BETWEEN UNITS OF RADIO CITY,
NEW YORK CITY, 6600 LINEAR FEET OF 0.375-IN. FILLET-ARC-
WELDING WITH G-E ELECTRODES, TYPE W-20, AND WELDERS, TYPE

THREE MONTHS ... 41 Stories

On an erection schedule averaging three complete tiers a week, the most recent addition to Rockefeller Center went up faster, it is believed, than any other structure of equal size and height ever built. To accomplish this, the erectors had to have steel deliveries at a great rate, on time without fail, and conveniently made down to the last detail.

American Bridge Company resources—organizations, equipment, facilities—were ample for every demand. Over 21,000 tons of fabricated steel were routed through the Company shops and delivered complete in about three months.

Comparable service can be had on any structural steel project, however large or small, or difficult.

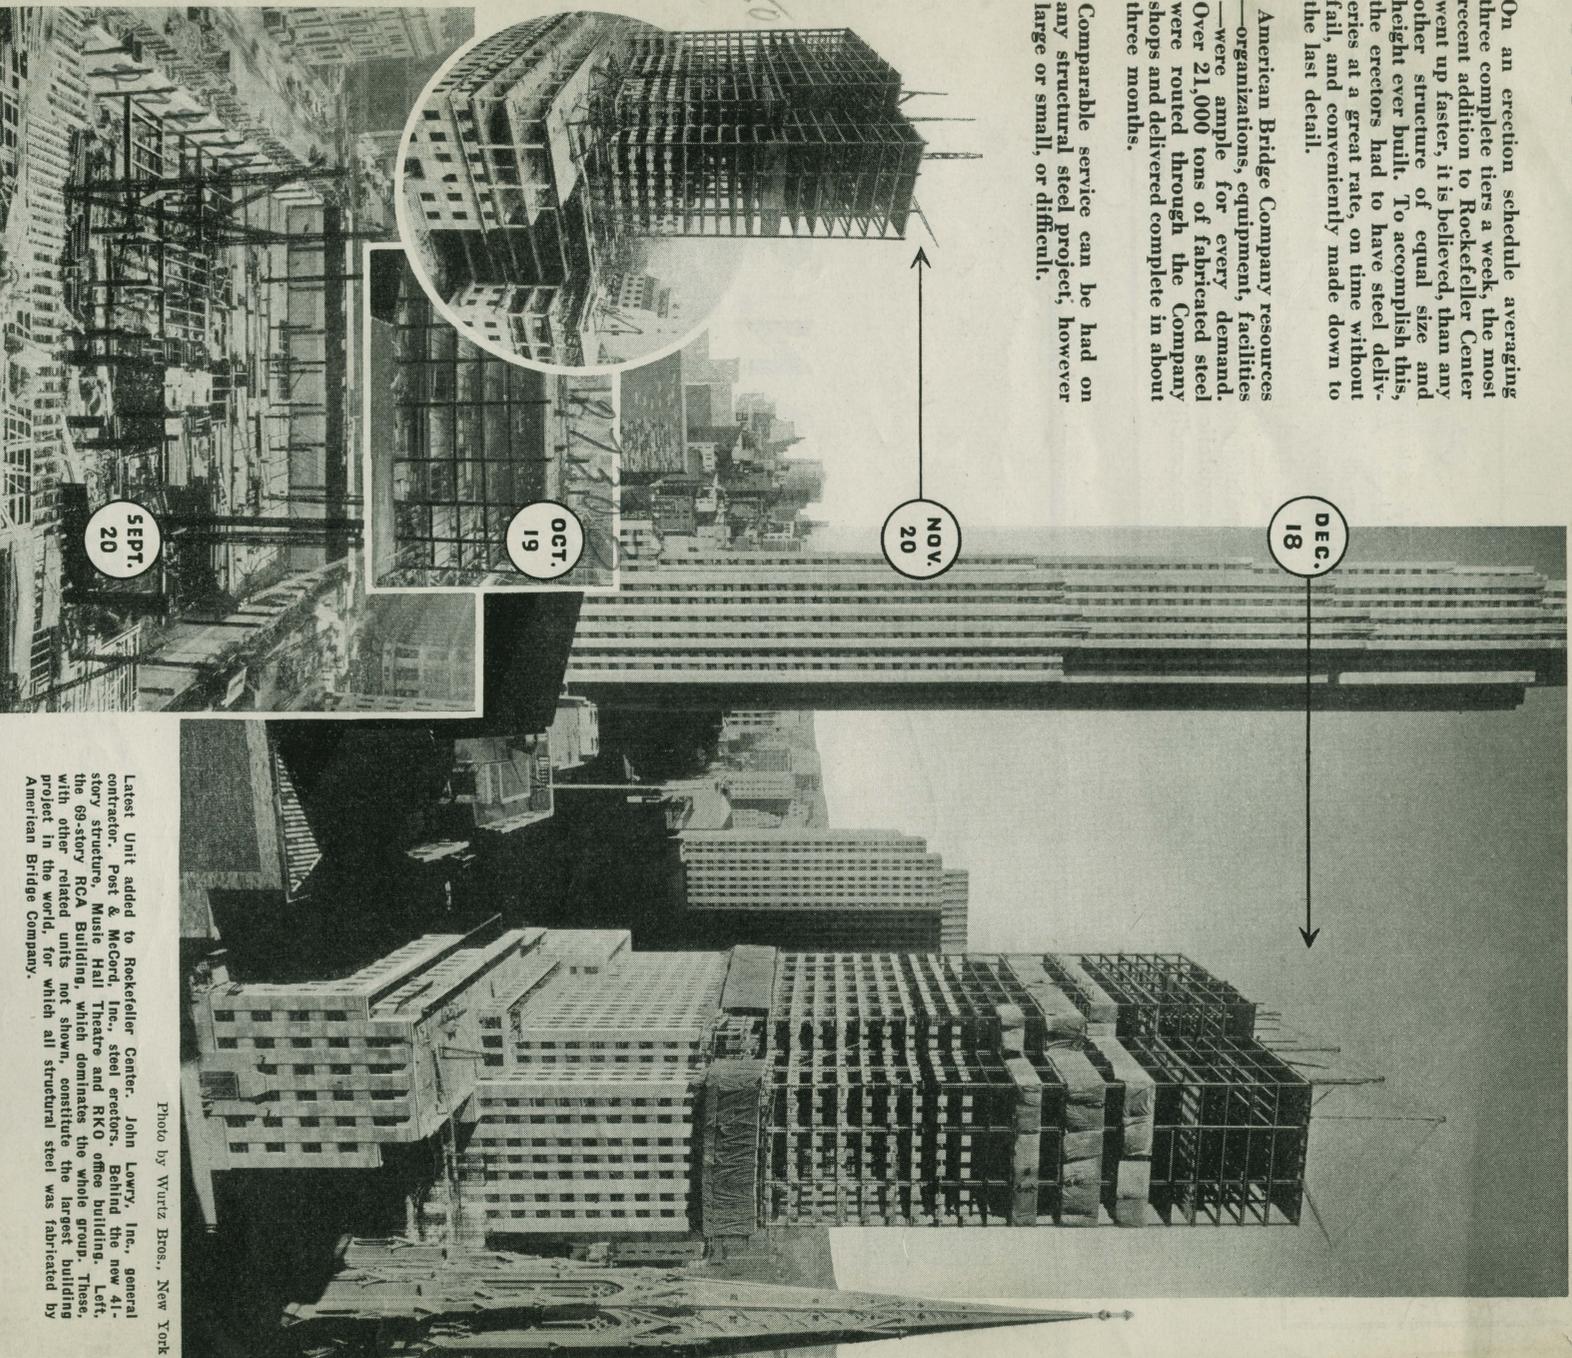

Photo by Wurtz Bros., New York

Latest Unit added to Rockefeller Center. John Lawry, Inc., general contractor. Post & McCord, Inc., steel erectors. Behind the new 41-story structure, Music Hall Theatre and RKO office building. Left, the 69-story RCA Building, which dominates the whole group. These, with other related units not shown, constitute the largest building project in the world, for which all structural steel was fabricated by American Bridge Company.

AMERICAN BRIDGE COMPANY

GENERAL OFFICES: FRICK BUILDING • PITTSBURGH, PA.

United States Steel Corporation Subsidiary

SERVICE

Our own fleet of trucks, driven by our own skilled men to meet your most urgent and instant requirements, plus a highly efficient Shipping Department, assure you of almost instantaneous service.

To that, we attribute in a great measure the prominence acquired by our Company in its Retail Warehousing Department.

PLANT

A modernly equipped plant occupying an entire city block. Adequate cutting facilities for supplying all steel products to required sizes and lengths.

We house all steel products under covered roof. Our Sheet and Cold Drawn Departments are maintained at an even temperature through thermostatic appliances, thus assuring prime surface conditions.

METAL

OPERATED—AMERICAN STEEL

Quality Steel Mills

TO FABRICATORS AND IRON WORKERS

We do not sell fabricated steel. We firmly believe that the fabricating of steel belongs properly to the Iron Workers and Fabricators, and should not be within the province of retail warehousing.

Our Order Dep't at Your Service From 6 a. m. to 7 p. m.
